

EasySave 3.0 - Release Notes

New in version 3.0

- Parallel backups: multiple jobs can run at the same time (Run All).
- Per-job Play, Pause, and Stop with live progress percentage.
- Business software detection: all jobs pause while configured apps run; auto-resume when closed.
- Priority file extensions: critical files are copied before others, even across parallel jobs.
- Large-file limit: optional threshold (KB) so only one large file transfers at a time network-wide.
- Centralized daily logs: optional TCP log server (EasySaveLogServer), deployable with Docker.
- Log mode in settings: Local, Centralized, or Local and Centralized (customer choice).

Carried over from 2

- Graphical interface (Avalonia), unlimited jobs, JSON/XML logs and state.
- CryptoSoft encryption for selected extensions; multilingual UI (EN/FR and more).
- Real-time state file (state.json or state.xml) with progression and current file path.
- CLI unchanged: EasySaveWpf.exe 1-3 / 1;3 compatible with earlier versions.

Components

- EasySaveWpf (.NET 10): desktop client. EasyLog.dll: local daily log library.
- EasySaveLogServer (.NET 8): central log collector on TCP port 5132.
