

RELEASE NOTE

1. EASYSAVE VERSION 1.0

- Initial deployment of the EasySave Core Engine.
- Support for multiple simultaneous backup job configurations.
- Introduction of Differential backup logic for storage optimization.
- Real-time State monitoring (state.json) for automation tracking.
- Integrated multilingual support (FR/EN).
- Externalized Logging via EasyLog DLL.

2. EASYSAVE VERSION 1.1

- Configurable log file format: choice between JSON and XML (Option [8])
- Configurable state file format: state tracking available in JSON or XML (Option [9])
- Format preferences are saved in settings.json and persist after application restart
- Menu update: Exit moved to Option [10] to integrate new format features
- Bug fix: changing log format no longer overwrites the state format preference
