

TECHNICAL SUPPORT INFORMATION

1. GENERAL SPECIFICATIONS

- Version: 1.1 (Deliverable 2)
 - Operating System: Windows 10/11 / Windows Server 2019+
 - Library Dependency: EasyLog.dll (included)
-

2. DEFAULT SYSTEM PATHS

To ensure maintainability and security, all configuration and log files are stored in the user's AppData directory:

- Root Folder: C:\Users[User]\AppData\Roaming\EasySave
 - Config File: ...\\EasySave\\backup_jobs.json
 - Settings File: ...\\EasySave\\settings.json
 - State File: ...\\EasySave\\state.json or state.xml (depending on selected format)
 - Logs Folder: ...\\EasySave\\Logs\\9
-

3. LOGGING SYSTEM

EasySave generates daily log files. The format is configurable by the user (NEW in v1.1):

- JSON (default): format YYYY-MM-DD.json
- XML: format YYYY-MM-DD.xml

Logs include the following information:

- File name and size
 - Source and destination paths
 - Transfer time (in milliseconds)
 - Execution status (Active, Finished, Error)
-
