

RELEASE NOTE

NEW IN VERSION 2.0

- Graphical User Interface (GUI): Complete migration from Console mode to a WPF/Avalonia-based interface for improved user experience.
- Unlimited Backup Jobs: Removal of the 5-job limitation; users can now configure an unlimited number of tasks.
- CryptoSoft Integration: Ability to encrypt files using the external CryptoSoft software for specific user-defined extensions.
- Log Evolution (XML/JSON): Implementation of multi-format logging (JSON or XML) based on user preference, this time manager in an UI settings window .
- Business Software Protection: Automatic suspension/prevention of backups if prohibited "Business Software" (e.g., a calculator or notepad) is detected.
- Enhanced Logging: Added encryption time metrics to the daily log files.
